SUMMARY

Azure Integration Developer with 3 years of experience in designing, implementing, and maintaining enterprise grade system integration solutions. Proficient in developing scalable interfaces using the full Microsoft Azure stack and modernizing legacy cloud infrastructures to drive operational efficiency. A collaborative professional with strong problem-solving capabilities and a proven ability to provide technical insights that enhance system design and interoperability in complex global environments.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions, Hyderabad

Sept 2023 - Present

Azure Integration Developer / Associate

- Designed, developed, and supported 20+ enterprise integrations using Azure services enabling seamless system-to-system communication.
- Built and maintained data integration, transformation, and orchestration workflows, automating critical business processes and reducing manual effort while improving operational efficiency.
- Delivered 30+ enhancements, bug fixes, and production releases, improving application performance, scalability, reliability, and user experience across business-critical applications.
- Managed production support, monitoring, logging, incident resolution, and root-cause analysis, helping maintain 99%+ system availability and operational stability.
- Implemented and maintained CI/CD pipelines using Azure DevOps, streamlining deployments, improving release quality, and supporting continuous delivery practices.
- Collaborated with international stakeholders, business users, and cross-functional teams to translate business requirements into scalable cloud integration solutions within Agile/Scrum environments.
- Utilized JIRA, ServiceNow, and Azure Boards for project tracking, defect management, sprint planning, and delivery coordination across multiple integration initiatives.

SKILLS

.NET Technology: .NET, .NET MVC, .NET Web API, ADO.NET, Entity Frameworks

Languages: C#, SQL

Azure Services:

- Web Services: Azure Function App, Azure Logic App, Azure Service Bus, Event Hub, Event Grid, Web App Services, API Management, REST APIs
- Data Services: Azure Data Factory, Azure SQL Database, Azure Blob Storage, Azure Storage SFTP
- Security & Monitoring: Azure Key Vault, Azure Log Analytics, Application Insights, Azure Alert rule, Grafana

Templates: JSON, XML, REST/SOAP APIs, Liquid template, JSON/XML transformations, CSV/JSON transformation

DevOps: Azure DevOps (Pipelines, Repos), Git, CI/CD: Continuous Integration and Continuous Deployment

Tools: Postman, Swagger, Jira, ServiceNow, Azure Data studio, Azure service bus explorer, Azure storage explorer

IDE: Visual Studio 2022, Visual Studio 2026, Visual Studio Code

EDUCATION

PVP Siddhartha Institute of Technology, Vijayawada

2019 - 2023

Bachelor of Technology in Electronics and Communications Engineering

PROJECTS & EXTRACURRICULAR

Project: Supply Chain Integration

Client: Whitbread

Description: Whitbread, a prominent player in the hospitality industry, is transitioning its supply chain operations in the UK from the current supplier, GXO, to Bidfood. A synchronous azure integration application is designed to transfer the Food and Drinks order, acknowledgements and receipts received from 950+ hotels.

Key Services: Azure Data Factory, Function App, Logic App, Blob Storage, Service Bus, Log Analytics

Roles & Responsibilities:

- Implemented the core transformation logic (TXT to GS1 XML) using Azure Function App
- Used Service bus, Storage and Logic apps to transfer orders via HTTPS AS2
- Used Log Ingestion to insert the custom Logs in Log Analytics and configured alerts

Project: File Transfer Engine

Client: Whitbread

Description: An innovative and re-usable solution designed using Azure Data Factory to streamline the automation of data and file transfers between its internal systems and those of its vendors for its day-to-day operations by introducing a suite of advanced features designed to enhance approach and ensures a streamlined, secure, and highly functionality and user experience surpassing older FTP solutions.

Key Services: Azure Data Factory, SQL Database, Function App, Logic App, Blob Storage, Log Analytics

Roles & Responsibilities:

- Build and deployed ADF pipelines which dynamically copy the files from sftp to another sftp
- Used Azure SQL to get configuration related details for pipeline to run
- Used azure function to trigger the ADF pipeline with credential and log the data using log ingestion

Project: AWS Connect – Agent Workspace App

Client: Whitbread

Description: An Azure Web API solution designed, to fetch the booking reservations data from Customer Data Hub team (Accenture) when invoked from an Agent workspace in AWS Connect app used by contact center.

Key Services: Azure Web API, Azure API Management, Application Insights, Key Vault

Roles & Responsibilities:

- Build and deployed .Net 10 Web API solution and hosted the APIs on Azure API Management
- Enhanced security by setting the Bearer token and subscription key authentication.
- Added dynamic API versioning ability to handle future scenarios smoothly.

CERTIFICATIONS

- Microsoft Azure Developer Associate (AZ-204)
- Microsoft Azure AI Fundamentals (AI-900)
- Microsoft Azure Fundamentals (AZ-900)
- Microsoft GitHub Copilot (GH-300)

AWARDS & ACHIEVEMENTS

- Cognizant Bluebolt Excellence Awards 2025 for File Transfer Engine Integration (Best Team Innovation)
- Cognizant Cheers Bronze Award for driving success in Supply Chain Integration
- Received 2 other Cognizant Cheers Award for Year-End performance and Production Support Reliability
